Instrument Care Reminders

Before putting your instrument back in its case after playing, do the following:

- Remove the reed, wipe off excess moisture.
- Remove the mouthpiece and wipe the inside with a clean cloth. Place the reed back on the mouthpiece.
- Hold the upper section with your left hand and the lower section with your right hand. Gently twist the sections apart. Shake out the excess moisture.
- Drop the weighted chamois or cotton swab into each section and pull it out the bottom.
- Carefully twist the barrel and bell from each section. Dry off any additional moisture.
- As you put each piece back in the case, check to be sure they are dry.
- Your case is designed to hold only specific objects. If you try to force anything else into the case, it may damage your instrument.

- = Open
- = Pressed down

Alternate fingerings are used in certain situations to allow for smoother technique. These are shown to the right of the more common fingerings.
